

We believe that the internet should be available to everyone at a reasonable price; not just huge multinational companies with enormous budgets. We especially cater for individuals and small to medium-size companies.

We never want to be the biggest ...
... just the BEST!

An open approach to web design puts YOU in control. We use plain English, not complicated computer jargon, and we offer a range of design options, from a single page to a fully customised web. You can also choose from a variety of packages designed to suit every budget.

Additionally we offer advertising discounts and special rates for worthy causes such as charities and good-causes groups. Netpark's staff have a commitment to providing a range of quality services at competitive prices.

Founded in 1990, Netpark provides a wide range of web design services and I.T. Consultancy.

Our talented staff have collectively, over 35 years experience with a wide variety of computer-based skills and a strong emphasis on programming, graphic design and layout, combined with a methodical and formal approach to software testing and quality assurance.

From the initial planning stages, right through to the release of your web site, Netpark can help you make your mark on the internet and put your business or interest on the map!

But don't just take our word for it...here's what some of our customers have had to say about Netpark:-

"I have no hesitation in recommending the services of Netpark, who have turned a rather limp web site into a major sales support tool for our business in almost impossible timescales."

Barry Collum, BDC.

"...great strengths are attention to detail and ability and willingness to complete a task to a set deadline...have been known to work all hours of the day and night when necessary to complete a job on time... show a lot of initiative and will often develop new and improved ways of performing a task."

U.Nelson, Citibank.
